

NOTES:

- 1) Signs and Markings shall be in accordance with the MUTCD.
- 2) Advance signing at each location is optional when part of an area wide scheme.
- 3) Landscaping designs, if any, to be determined by the community and approved by the Engineer. Sight distance shall not be impacted by landscaping. Fixed objects shall not be placed in any portion of the measures that are within the clear zone.
- 4) Use of Stop or Yield Sign as determined by the Engineer.
- 5) Engineer to modify design to accommodate field conditions (ex. drainage) and available ROW while conforming to VDOT's Road and Bridge Standards and Specification manuals, AASHTO publications and acceptable engineering practices.
